

Quantifi Photonics and ACE Solution Co. Ltd sign distribution agreement

MARCH 28, 2022

Quantifi Photonics and Ace Solution Co. Ltd sign distribution agreement for growing Taiwan photonics test and measurement market.

The partnership means Ace Solution will offer Quantifi Photonics' range of optical test instruments to customers in the photonics and RF industries. With many instruments available as PXIe modules, customers can look forward to expanding the optical test capabilities of their existing PXI test systems.

As the world's primary manufacturing location for the semiconductor industry, Taiwan offers many opportunities for test and measurement suppliers as manufacturers invest into emerging technologies such as silicon photonics and next-generation communication devices.

Dan Henmi, VP of Sales for Quantifi Photonics says, "We are excited to partner with Ace Solution Co. Ltd as they have very strong experience and understanding of customer's needs in these markets. Together, our companies can solve customers' challenges with our optical test instruments and use our expertise to quickly develop and deliver customized test solutions."

Customers in Taiwan involved in semiconductor manufacturing and other optical applications are highly anticipating the availability of Quantifi Photonics solutions and services according to Ace Solution VP of Business Development, Tony Hsu.

"Due to the high quality and cost-effectiveness of Quantifi Photonics instruments, we are very confident of satisfying our customers' growing needs for optical test capabilities. Interest in photonics test and measurement products is very high, and Quantifi Photonics offers extremely competitive solutions," says Mr Hsu.

About ACE Solution Co., Ltd.

Based in the field of wireless communication testing for 20 years, ACE Solution insists on standing with customers, providing software/hardware integration solutions for wireless test equipment systems that meet customer needs and create a win-win situation. Their experienced technical team provides exceptional service and support, providing customers with diversified choices & continue success of wireless testing integration services.
