「 Predator 」

AI IR / Visible Light for temp screening system

Outbreak spread

VS

Resumption of work

It's not a multiple choice from opt. 1 or 2 .

It's a trade-off issue, a tough situation for local governments concerns and company survival decision.

If you consider to resume work, We pleased to introduce ACE Biotek's AI "Predator" IR / Visible Light temp screening system to assist personnel of access the gates / this Predator system is great to protect by screening employee & visitors with this productive equipment for enhance safety monitor & good compromise solution.

"Epidemic prevention is like war fighting"

Let us work together to avoid the expansion of immunity, and it will become a "standby screening equipment" in the field where most people enter and exist in the future.

At the same time with IR real-time body temperature, high resolution and mask automatic identification dual-system screening function equipment, rare in the market. Let us know if you have any questions or orders assists needed .
